Per our e-mail correspondence and corrections made to sets of drawings I have approved set of drawings received for printing. C. Randolph Your serial number does not seem to match drawings on our Edan system.

Subject: further corrections for 09/872,919

Mr. Randolph wrote:

Hello Mr. Schermel the Drawings are set up very well and I see much improvement. I am still concerned with the line quality. They could be sharper and the reference characters more uniform. Sincerely C. Randolph

Hello again from F. Schermel: I cleaned up the lines and tried to get the reference characters the same size. The scanned drawings are magnified causing the drawings to look worse than they really are. The small spots are not visible on the actual pages. Some of the lines seem jagged but this is also not visible on the actual drawings. I hope this is acceptable, if not I would appreciate further guidance.
thank you - Ferdinand Schermel
